| College | Health Sciences |

BIOGRAPHY (EDUCATION/PROFESSIONAL EXPERIENCE/PROFESSIONAL ACCOMPLISHMENTS)

I graduated as a Physiotherapist from The University of Nigeria, Enugu Campus in 2007 with a Bachelor of Medical Rehabilitation in Physiotherapy degree and after the 2 years of internship and mandatory National Youth service training, I began working as a rotational physiotherapist at Enugu State University Teaching Hospital. After confirmation of my service, I went on to obtain Master of Science degrees in Medical Rehabilitation (Physiotherapy) and Anatomy (Human Anatomy) from the University of Nigeria, Nsukka, in 2014 and 2017 respectively. I am at present, in my last year of study for a Doctor of philosophy (Ph.D) degree in human Anatomy.

I am a practicing Physiotherapist with a current registration with the Medical Rehabilitation Therapist Board of Nigeria. I currently work as the Chief physiotherapist at Enugu State University Teaching Hospital and a part time lecturer II in Evangel University Akaeze. I am committed to continued professional development through regular certification and update courses, scientific conference and other trainings in the areas of musculoskeletal rehabilitation, clinical education, critical care and wound management.

I am a clinical researcher and have taken the lead in several research works (most of which are in the process of being published), which stem from identified clinical problems across different specialties. These projects also go beyond Physiotherapy to include other healthcare services providers. I have also collaborated with other Physiotherapists and researchers in different research works, with findings presented to different national and international audiences, including The Association of Clinical and Academic Physiotherapists of Nigeria and The International Society for Burn Injuries.
