BIOGRAPHY (EDUCATION/PROFESSIONAL EXPERIENCE/PROFESSIONAL ACCOMPLISHMENTS)

I had my primary and post primary education in Lagos State. After which I proceeded to the University of Ibadan for my B.Sc and M.Sc degrees, both in pure Mathematics. Am currently a Ph.D student of Mathematics at the university of Port Harcourt. Have had teaching experience in Mathematics as far back as 2013 and 2014 where i lectured at Espam formation university, Cotonou, Benin republic. I taught algebra and numerical analysis courses to computer science students and had experience in applying Graph theory to solving real life problems in industry and the social media space. I have interest in working with young undergraduates seeking to apply mathematical theories and principles to finding solutions to real life problems in image reconstruction, signal processing and in some other areas of human endeavour. Have supervised undergraduate mathematics students on some areas of mathematics like mathematical analysis and applications of numerical analysis in solving nonlinear ordinary differential equations. Mathematics is beautiful and holds the key to many technological real life problems. Mathematics is indeed the mother of all science!!!
